

Preliminary

# Appendix G

Requisite Project Permits

	PERMIT TIMEFRAME <sup>1</sup>	PERMITS																				
		Local (City of Stanwood)										State (Agencies include the Washington Departments of Fish and Wildlife (WDFW), Natural Resources (DNR), Ecology, and Archaeological and Historic Preservation(DAHP))						Federal (Agencies include the US Army Corps of Engineers, US Fish and Wildlife Service, National Marine Fisheries Service,				
		Master Permit Application	SEPA	Site Development (includes Filling / Grading)	Building Permit	ROW Permit	Land Use Conditional Use Permit <sup>2</sup>	Shoreline Substantial Development or Other	Critical Areas	Floodplain Development	Filling and/or Grading (standalone)	Hydraulic Project Approval	Aquatic Use Authorization <sup>3</sup>	Section 401 (Individual Permit)	Construction Stormwater General Permit <sup>4</sup>	WSDOT Utility or Franchise Approval	Governor's Executive Order 05-05 <sup>5</sup>	Coastal Zone Management Certification (Individual)	NEPA <sup>6</sup>	Section 404 (Nationwide) <sup>7</sup>	Section 404 (Individual)	Section 10 <sup>8</sup>
<b>Separation Alternatives</b>																						
Alternative 1A	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
Alternative 1B	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
Alternative 1C	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
Alternative 1D	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
Alternative 2	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
Alternative 3	2-4 months	x	x	x		x					x				x							
Alternative 4	8-12 months	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
<b>Conveyance Alternatives</b>																						
Alternative A	12-18 months	x	x	x				x	x	x	x	x	x	x		x	x	x	x	x	x	x
Alternative B	12-18 months	x	x	x				x	x	x	x	x	x			x	x	x	x	x	x	x
Alternative C	12-18 months	x	x	x				x	x	x	x	x	x			x	x	x	x	x	x	x
Alternative D	12-18 months	x	x	x				x	x	x	x	x	x			x	x	x	x	x	x	x
Alternative E	12-18 months	x	x	x				x	x	x	x	x	x			x	x	x	x	x	x	x

<sup>1</sup> Permit timeframe reflects timeframe for both permit application preparation and agency review/approvals, and is based on the longest lead time permit anticipated to be required for a given alternative. Since proposed improvements are conceptual in nature, permit timeframes are anticipated to change as alternatives are further refined.

<sup>2</sup> The pump stations for Separation Alternatives 1 and 2 are anticipated to be sited in General Industrial or General Commercial Zones. Utility facilities in these zones are considered unclassified uses, subject to interpretation by the City's Community Development Director (SMC Zoning Code 17.30.020). If determined to be a conditional use in the zone within which the pump station is located, a Conditional Use Permit would be required.

<sup>3</sup> An Aquatic Use Authorization is anticipated from DNR for work in the Stillaguamish River, but not work in Irvine Slough. Additional coordination with DNR to confirm their jurisdiction for a proposed alternative is recommended as alternatives are further refined and selected.

<sup>4</sup> A CSGP is required for projects that will impact greater than one acre of land and involve discharges to waters of the State.

<sup>5</sup> GEO 05-05 would be required for any projects implemented when State funding is provided. Those projects with or without State funding that also have a federal nexus (i.e., federal funding, land, or permit) would be required to comply with Section 106 of National Historic Preservation Act, which also reviews project impacts on historic and archaeological resources. In the event that Section 106 is required for a project, it would trump GEO 05-05 review.

<sup>6</sup> The level of NEPA review and approval would be dependent on the alternative and the level of federal permit compliance necessary (i.e., NEPA for an alternative that can be permitted under a Nationwide Section 404/10 permit would likely be a Categorical Exclusion and/or have NEPA compliance completed by the Corps versus an alternative that requires an Individual Section 404/10 permit would likely require an Environmental Assessment for NEPA compliance and/or an EIS if significant environmental impacts are likely).

<sup>7</sup> A Section 404 Nationwide permit would apply to an alternative that fits into a nationwide category, as determined by the US Army Corps of Engineers. Nationwide's are streamlined permit processes, which have already undergone reviews under additional permit processes (i.e., Section 401 review); they typically require 6 months or less. If an alternative does not apply as a nationwide permit, it would be processed as an Individual permit. As the specifics of Separation Alternatives 1 and 2 are currently unknown, RH2 assumed the level of impact and review would fit within a nationwide category.

<sup>8</sup> A Section 10 permit is anticipated to be required for any work within or on the banks of the Stillaguamish River, but is not anticipated for work in/near Irvine Slough. Section 10 is required for structures or dredge/fill in navigable waters, of which the Stillaguamish at the location of the proposed projects is anticipated to be included.
